there is no doubt about baeck s contribution to jewish theology in the twentieth century it has been significant without ever departing completely from the ancient wellsprings of orthodoxy he was a studious observer of the intellectual currents of his time and ambience under the influence of liberal jewish theology he drew on and reworked those currents weaving them into his own theological thought a special aspect of baeck s work is that he remained in critical confrontation with christianity throughout his life acting as a kind of builder of bridges between the two faiths from the introduction it is on this aspect that the author focuses his study in which he examines leo baeck s critical evaluation of martin luther and protestantism at the same time homolka shows how close the intellectual links between liberal christian and liberal jewish theology had become before the holocaust both sides attempted a new definition of the essence of their faiths and were searching for a new identity in an increasingly pluralistic and secular society
